■ Tomb in chamber no. 10

The tomb in chamber no. 10 is further north than tomb no. 5, more or less in the central area of the hypogeum necropolis of Monte Sirai, a complex that dates back to the period of the Carthaginian conquest and dated to between the 5th and 3rd century BC.

The entrance, at the end of the usual access corridor (named *dromos*) with steps (figs. 1-2), is on one of the long sides, like in tombs 2, 4 and 8 of the same necropolis.

The chamber is rectangular; the walls contain niches and loculi (fig. 3). Four pits dug into the floor could house offers and perhaps the feet of a funeral bed, or another structure (fig. 4).
